CONSERVE
WATER....

OUR FUTURE
NEEDS IT!

- Avoid leakage of water from taps.
- Turn the tap off when not in use especially when you brush your teeth or wash clothes.
- Check the leakage of water in the toilets. Also get check the hidden water leaks.
- Never throw the water unnecessary on roads which can be used for gardening and cleaning.
- Avoid unnecessary flushing the toilets. Use minimum amount of water to bath.
- Water your lawn only when it is needed.
- Do not leave the tap running while washing the dishes in the kitchen.
- Install small shower heads to reduce the flow of water.

About Us

HIRAN has been devoted to the brand values of high caliber quality, engineered design and impervious durability that portray HIRAN's commitment to create exceptional exposure and deliver pure bath intimacy. At HIRAN we believe that prominent business and gratifying ecosphere go hand in hand. It's our pledge to work in harmony with nature and in everything do. Unhindered around 3 decades rich with quality we have changed perception of what bathroom can be and how it can be used.

The company take pride in its potentiality to deliver splendid, luxurious product range with exquisite design & ambidextrous functionality. The company nurtures total quality management (TQM) and follows stringent measures on par with international quality standards. An exemplary country wide network of dealers and supply house make sure that HIRAN products are available at all prominent sanitary and hardware stores across the nation. We persistently engage ourselves in research and development in addition to the periodical analysis about the market trends.

Our Motto

QUALITY AND DURABILITY
SERVICE AND ASSURANCE
CO-OPERATION AND PROSPERITY

Study says finest ideas come to you when you are in your bathroom, so why keep it simple create a flawless stunning bathroom with HIRAN's bath fittings and accessories and let your brain give you flawless ideas while you rediscover the joy of bathing .

You'll be blown away by the beauty and design of our PTMT taps, especially when you see their finish. Their colours could leave you confused as to whether you are looking at poly tetramethylene terephthalate (PTMT), or ivory, or some other material. They up the style quotient in any bathroom they are used. For example, the two-way bibcock would be more appropriate for the kitchen, while the 2 in 1 angle cock would be useful in the bathroom to service the shower.

Filter Shower
576

FUNCTION

- Remove chlorine.
- Reduce chemical absorption and vapor inhalation.
- Remove water soluble heavy metals.
- Remove lime, scale, dirt, sediment and fungi in showers.

THE HARM OF CHLORINE

Showering chlorinated water, a chemical prevalent in water supplies, can be easy to absorb the chlorine by vapor cause damage for health. Chlorine can strip the protective oil from the hair causing it to frizz and become brittle. Chlorine can also strip away the skin's oil causing to dry and crack, leading to premature signs of aging.

COMPOUND

KDF, Calcium Sulphite, Active carbon, S.S. Filter mesh.

HAIR & SKIN CARE

Washing hair filtered water helps to protect and restore its natural luster resulting in improved body and shine. Protect your skin and feel refreshed by showering in filtered water.

FILTER ADAPTOR

Could be used to shower head, shower set, wall elbow, shower mixer & shower rail set F1/2in, M1/2 out.

575

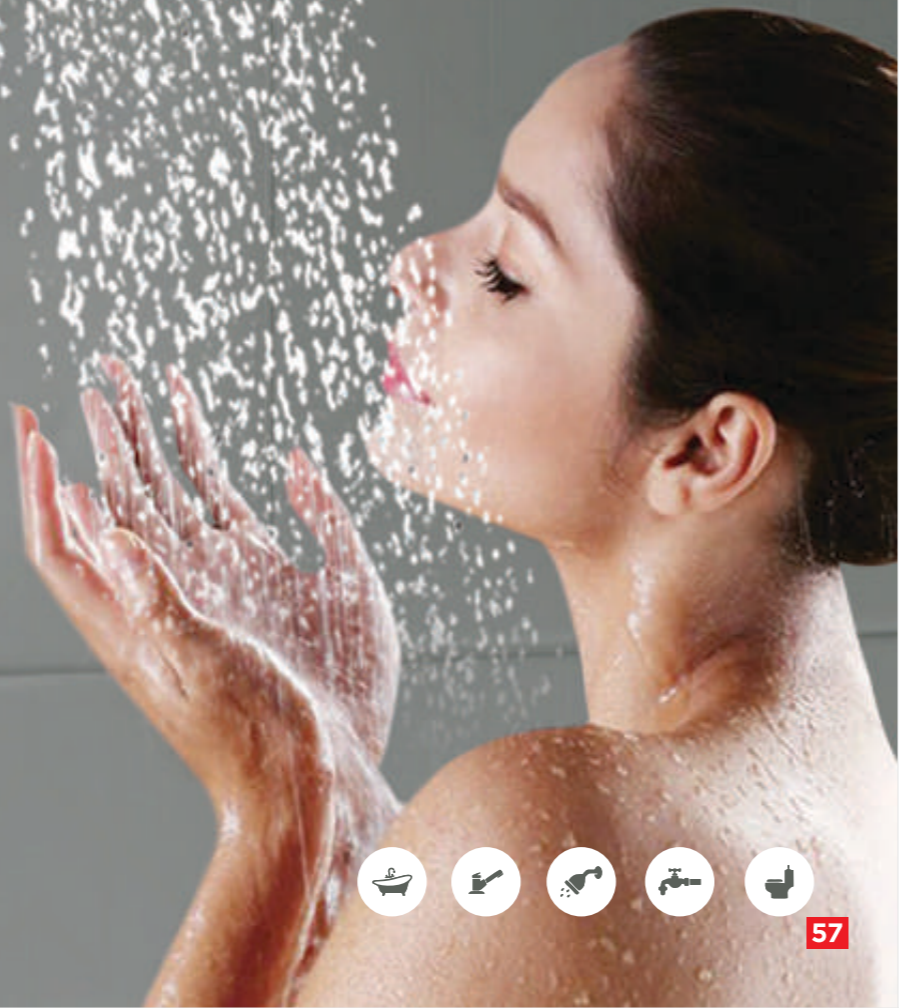

SELF CLEANING SHOWERS

Healthy & environmental protection, air pressured & no blocking, take care every inch of your skin.

The self-cleaning feature of the shower revolves around the innovative technology and the simplicity of its functionality. Dislodging build-up every time the shower is turned off ensures the nozzles remain clear of residue and calcium build-up to ensure a consistent delivery of high water pressure.

A ball valve is a shut off valve that controls the flow of a liquid or gas by means of a rotary ball having a bore. By rotating the ball a quarter turn (90 degrees) around its axis, the medium can flow through or is blocked. They are characterized by a long service life and provide a reliable sealing over the life span, even when the valve is not in use for a long time.

KEY FEATURES

- Resistance to high pressure
- Compact assembly
- Quick opening and closing
- Easy maintenance
- Acceptable for pigging operation

Check Valve keeps fluids from backing up into the water supply and prevents backflow from wells and boiler systems. This check valve is lead free and suitable for all potable water supply installations. They have a screwed cap, swing type disc and integral seat. It is constructed of brass for strength and durability.

KEY FEATURES

- In-line back flow preventer
- For horizontal installation
- Threaded ends
- Automatic operation
- Durable brass construction
- California residents

Introducing sinks that you can't take your eyes off. Maintain your kitchen's health and hygiene with our highly efficient and astoundingly sturdy sinks. Designed while keeping your priorities in mind, these sinks are durable, reliable, resistant to dents and dings. The efficient clean drain technology ensures that no stubborn food waste sticks to the edges or clogs your sinkholes. Made with highly recommended food grade stainless steel, our sinks are the safest for prolonged and continuous use by your family. The add-on benefit of innovative dual sound absorption feature prevents noisy dishwashing so that it doesn't disrupt the calmness of your kitchen.

BOTTLE TRAP

Bottle Trap
328

The bottle trap is an essential element of the basin's plumbing that keeps the bathroom hygienic and odor-free. When we use the basin, the used water goes down the basin waste, into the drainage pipe, and then into the sewer, where a lot of other waste and dirt is accumulating. Naturally, that accumulation involves a lot of nasty and potentially harmful gases.

INTERNAL FITTINGS

HALF TURN

(NEW FRT TECHNOLOGY) / QUARTER TURN

HIRAN internal fittings are made of Brass, which as high tensile strength & is corrosion resistant. HIRAN internal fitting is made of **Drop Forged** Bannet, the sturdiest from of casting, Valve & spindle are made of extruded rod whose composition is lab tested. To establish the quality of HIRAN internal fitting performance test is carried out of **one-lac operations**. Hydraulic pressure test is also performed on bonnet of leakage test. Advanced international **Double 'O' Ring** protection provided at the bottom of the spindle to stop water entering the threads; this keep threads lubricated resulting in lesser wear & tear and longer life. Grease used for threads as well as 'O' rings are silicon based compound **Food Grade Grease**, which are specially made for Metal -To-Metal and Rubber-To-Metal contact as per requirement. Ceramic Disk is also tested for alumina and silica content, we test that Alumina content in our ceramic disk should be 95% to ensure its long life, air compression pressure test is also performed for leakage test.

SINGLE LEVER CARTRIDGE

Single Lever ceramic cartridge is used in 40mm diameter to ensure maximum water pressure. Ceramic Disk is also tested for alumina and silica content, we test that alumina content in our ceramic disk should be 95% to ensure its long life, Air Compression pressure test is also performed for leakage test.

WARRANTY TERMS

Dear Customer, Thanks for choosing HIRAN. Your HIRAN product is warranted for 5 years against any manufacturing defect, however warranty is subjected to following terms & conditions.

- Maximum liability of the company is limited only to repair or replacement of the piece.
- Warranty is not accepted in case of improper or incorrect use or installations, normal wear & tear, careless use and improper maintenance etc.
- Plastic, Rubber and A.B.S parts are not warranted against breakages and natural wear & tear.
- No warranty for mutilated & broken parts/pieces.
Company is not liable for any other loss, damage or expense born by the customer.
- In all cases decision of the company will be final and binding.
- All disputes are subject to Madurai Jurisdiction only.

SMART TIPS

HIRAN constantly strives to interact with customers and make its products consumer-friendly. The company's trained staff and executives maintain a direct interface with consumers, educating them about the product quality, convenience and maintenance. HIRAN also believes that customers must get the best out of its products. Hence it has evolved a set of consumers guidelines, which if followed ensure optimum and trouble-free performance with enhanced durability of HIRAN products for year to come.

DURING INSTALLATION

- Use 25 mm pipeline instead of 20mm to ensure better flow of water. Lay the pipelines straight and vertical as far as possible.
- More than required number of bends throttle the pressure of water. Keep the number of bends in the pipelines to a minimum. All the supply lines must have vent pipes which helps in giving a smooth flow of water from the fittings.
- Center to center distance of pipe fittings for Hot & Cold inlet for all types of wall mounted at 165mm by which any of our wall mixers can be easily installed without any problem.
- Place the outlet point in the overhead tank at least 2.5 cm above the ground level of the tank. This prevent flow of foreign particles, sand etc. along with water supply into the fittings avoiding the possible damage to the working parts.

POST INSTALLATION

- Cover the taps polypack before or after their installation till they are put to actual use to protect the fine finish of fittings from dirt, stains and other damages.
- Do not use harsh cleaning agents containing abrasives and acids, Instead use a soft sponge or wet cloth with soapy water /diluted vinegar to protect the colour finish.
- Clean the aerators provided in the items at regular intervals for a perfect flow of water from the fittings. To clean the aerator, remove it, knock out the silver insert and rinse thoroughly with water.
- Clean the overhead tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular intervals to avoid deposition of foreign.
